

ZEBACUS BITCOIN MINING PRODUCTS

THE EASIEST & FASTEST WAY TO INVEST IN BITCOIN MINING

ENJOY A SAFE AND HIGH YIELD BITCOIN MINING FROM ZEBACUS

ZEBACUS is excited to announce the successful launch of our third phase of BITCOIN MINING products with a higher potential for more earnings.

ZEBACUS is continuously working in providing the best mining products and solutions that can provide stability, consistency and high yields.

As already launched, the BITCOIN Mining potential is generally measured and sold in Hash Power (TH).

Therefore, we will be offering a total of 10 000 TH/s at a price of 200\$ PER TH/s.

BITCOIN MINING – PASSIVE INCOME PACKAGE

Benefits of this Product:

1. Highly liquid – you can cash your earned bitcoins anytime.
2. Easy – you can start mining in just 3 simple steps.
3. Fast – you start earning bitcoins immediately.
4. Profitable – Mine and earn more when the BTC price goes up.

Terms:

- Output produced by each TH will be shared on 50:50 ratio with the client, the 50% for the company is the hosting fee.
- Hosting fee includes Electricity, rent for the hosting space, Internet, 24*7 support to make sure machine runs without any interruptions. No other charges.
- Payout will be every Wednesday only in BTC, visible on clients ZEBACUS dashboard. In case of withdrawal, gas fee has to be borne by the Client.
- Validity of contract 3 years.

Return on Investment Scenarios

- A. With current BTC price (\$28000) market conditions: ROI will be 17%* per year
- B. If BTC price hits 100,000 USD: ROI will be 147%* per year
- C. If BTC price hits 1,000,000 USD: ROI will be 1770%* per year

DISCLOSURES

*Returns on Investment depends on various markets conditions, like mining difficulty rate, electricity costs, supply & demand, bitcoin pricing, etc.

**Risk disclosure: Previous success history and predictions do not always guarantee returns on investments. Above should not be considered as an investment advice but rather an informative document. The offer is based on liquid able bitcoin mining output and should be only treated as such.

BITCOIN PRICE HISTORY AND PREDICTION

Market predictions for bitcoin pricing from experts in the market:

QUESTIONS & ANSWERS:

① **Q. What is the Hashrate required for mining 1 BTC IN 1 year?**

A. Around 700THs (it depends on the power consumption and mining difficulty)!

② **Q. How many Bitcoins can you mine in a day?**

A. Based on the mining hardware inputs provided, 0.00062475 Bitcoin can be mined per day with a Bitcoin mining hash rate of 140.00 TH/s, a block reward of 6.25 BTC, and a Bitcoin difficulty of 28,174,668,481,289.00.

After deducting mining power costs and mining fees, the final daily Bitcoin mining profit is \$11.74 Bitcoin to USD.

③ **Q. How long does it take to mine 1 Bitcoin?**

A. It takes around 10 minutes to mine just one Bitcoin. It varies depending on a number of factors, including the power of the mining rig, the difficulty of the mining network, and the current Bitcoin price.

BITCOIN MINING FACTS:

- Bitcoin Blockchain Global Hash rate: 196.13 EH/s.
- Bitcoin mining Rewards: 900BTC total per day.
